## Subject: Release of New Product

---

### Mounted Felt Stick

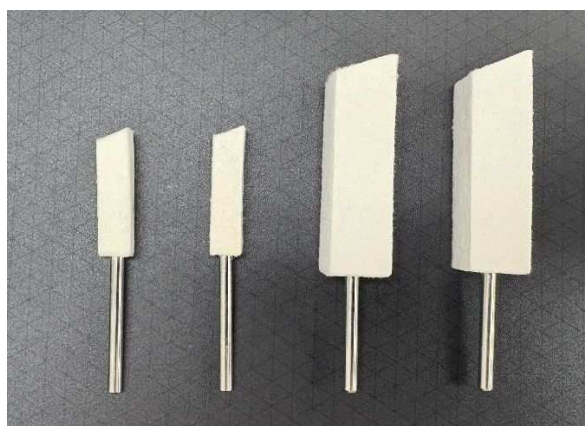

We are pleased to announce the release of our new product, the **Mounted Felt Stick**, and the product will be available starting Wednesday, **October 1, 2025**.

Introducing our new Mounted Felt Stick, specially developed for optimal performance in final-stage polishing. Designed for use with polishing compounds, these bars efficiently enhance surface luster and remove micro-scratches, delivering consistent and high-quality finishing results.

The lineup includes two types—Soft and Hard—each available in two felt sizes:  $6 \times 6 \times 25$  mm and  $12 \times 12 \times 45$  mm.

The felt is securely mounted on a metal shank, allowing it to be used not only with the dedicated hand holder released simultaneously, but also with electric reciprocating tools such as the RECIPRON and the RUBRON. This versatility enables more efficient polishing operations across various applications.

A dependable solution to support your polishing needs—be sure to take advantage of this opportunity.

## — Mounted Felt Stick —

### ■ Product Overview

A New Standard in Final Polishing — Introducing the Mounted Felt Stick

The newly released Mounted Felt Stick is specifically designed for final-stage polishing, delivering excellent performance in gloss finishing and fine scratch removal when used with a polishing compound. Its user-friendly size and shape make it ideal for detailed work, while the soft polishing feel ensures a natural finish on a wide range of materials.

Available in two types to suit different applications: the Soft Type provides a gentle touch, while the Hard Type offers firmness and control. Each type comes in two felt sizes— $6 \times 6$  mm and  $12 \times 12$  mm—allowing users to choose the best fit for their needs.

Equipped with a metal shank, the Mounted Felt Stick can be used as a hand tool when mounted on the dedicated holder released simultaneously. It is also compatible with powered tools such as the RECIPRON (reciprocating motion) and RUBRON (lateral motion), significantly improving work efficiency.

A trusted tool for a wide range of users seeking precision and reliability in their finishing process.

### ■ Product Characteristics

#### ~Compatible with Both Powered and Manual Tools~

Thanks to its metal shank, this product can be used as a hand tool by mounting it to the separately sold Hand Holder. It is also compatible with the electric reciprocating tool “RECIPRON” and the lateral motion tool “RUBRON,” making it suitable for a wide range of applications—from manual work to machine-assisted polishing.

When used with compound, it delivers excellent results in fine scratch removal and gloss finishing.
